

GENERAL RISK DISCLAIMER

ANY INFORMATION PROVIDED IN THIS DISCLAIMER OR BY FXBITCAPITAL GROUP LTD. IS FOR GENERAL INFORMATION PURPOSES AND NOT MEANT AS SPECIFIC ADVICE FOR YOUR INDIVIDUAL CIRCUMFLEXANCES OR AS PERSONALIZED TRADING ADVICE.

By acknowledging this statement and contracting for the services provided by **FXBitCapital Group Ltd.**, a Saint Vincent and the Grenadines Limited Company with a principal address of Suite 305, Griffith Corporate Centre, PO Box 1510, Beachmont, Kingstown, St. Vincent and the Grenadines (“FXB”, “we”, or “our”), you acknowledge that you have not sought advice from FXB regarding the appropriateness of Forex trading for you, and FXB has not provided any such advice to you.

RISKS ASSOCIATED WITH FOREX TRADING

Trading spot foreign currencies on the Foreign Exchange (“Forex”) is not appropriate for all investors, and the risks of Forex trading can be substantial. You should carefully consider whether Forex trading is right for you in light of your particular circumstances and financial resources. Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. Past performance is not indicative of future results. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

There is considerable exposure to risk in any foreign exchange transaction. Any transaction involving currencies involves risks including, but not limited to, the potential for changing political and/or economic conditions that may substantially affect the price or liquidity of a currency. Investments in foreign exchange speculation may also be susceptible to sharp rises and falls as the relevant market values fluctuate. The leveraged nature of Forex trading means that any market movement will have a proportional effect on your deposited funds. This may work against you as well as for you. Not only may investors get back less than they invested, but in the case of higher risk strategies, investors may lose the entirety of their investment. It is for this reason that when speculating in such markets it is generally recommended to use only risk capital or, in other words, only use money you can afford to lose.

You further agree and acknowledge that the trading signals provided to you by FXB are not, and are not intended to be, an offer or solicitation to enter into any Forex transaction, or any type of trading or investment advice, recommendation or strategy. You acknowledge that it is solely your decision to determine which, if any, FXB trading signals to use for trading (whether actual or simulated) at a retail Foreign Exchange Dealer, Futures Commission Merchant or other financial institution (collectively referred to as "Financial Institution"), and whether to send all, some, or none of the FXB trading signals to such Financial Institution for execution.

At no point will any trading signals provided by FXB be individual to you or your particular circumstances, nor will they be personalized to you. You understand that past performance associated with any trading signals offered by FXB, whether actual, hypothetical or historically "back-tested" is neither necessarily indicative of nor a guarantee of future performance or success.

Trading FXB signals may result in the total loss of the funds that you deposit at a Financial Institution, and you may incur losses in excess of your deposits. Leverage can work against you as well as for you.

Based on the foregoing, you agree that you shall not seek to hold FXB responsible for any losses associated with any trading signals provided to you by FXB. In the event that any claims, suits, actions, damages, liabilities, obligations, losses, or expenses (including reasonable attorneys' fees) arise out of or relate to the relationship between FXB and you, and/or any trading signals provided by FXB to you, you agree to indemnify and hold FXB harmless therefrom.

ELECTRONIC TRADING RISKS

Before you engage in transactions using an electronic system, you should carefully review the rules and regulations of the exchanges offering the system and/or listing the instruments you intend to trade. You should understand these and additional risks before trading.

RISKS ASSOCIATED WITH CRYPTOCURRENCY

Trading cryptocurrencies on margin carries a high level of risk, and may not be suitable for everyone. Past performance is not indicative of future results. The high degree of leverage can work against you as well as for you. Before getting involved in cryptocurrency trading you should carefully consider your personal venture objectives, level of experience, and risk appetite. AUTOMATED TRADING RISK

All Automated Trading Systems "ATS" carry risk, even if the long-term profitability is positive. There is no perfect system, nor is there a system that always wins. Any investment in ATS carries great risks, and it is important to note that the worst losing streak of a system can yet be to come, and can happen when the system is active in the user's account. The market circumstances can change from the period in which the system was designed, and the system's rules which have given positive returns in the past can start giving negative returns.
